Passionate and experienced WordPress Web Developer with a track record of building modern and innovative eCommerce websites. Proficient in customizing WordPress websites, implementing various plugins, and ensuring optimal website performance. Strong problem-solving skills, effective communication, and a proactive approach to technical challenges. Committed to continuous learning and delivering high-quality solutions.

EXPERIENCE

AUGUST 2021 – JUNE 2023

FRONTEND DEVELOPER, CLICKSERVICE

- Collaborated with the innovative team to build and customize WordPress websites for clients, focusing on modern eCommerce solutions.
- Configured themes and child themes according to client branding using CSS, ensuring a consistent and visually appealing design.
- Successfully migrated content from previous WordPress installations and implemented features using page builders like Gutenberg Blocks, Elementor, Divi, and WPBakery.
- Configured WordPress to send emails via SMTP using the WP Mail SMTP plugin and created custom forms using Gravity Forms and WP Forms.
- Implemented Google Tag Manager, Google Analytics, and marketing pixels to enhance website performance and tracking.
- Troubleshooted web server configurations across popular hosting providers, ensuring optimal website speed for desktop and mobile devices.
- Maintained technology updates for themes, plugins, and PHP, optimizing website speed and performance.
- Problem-solved and researched custom functionality needs, effectively communicating progress and recommendations to internal and external teams.
- Organized website technology, access, and licenses per client, ensuring efficient content updates and maintenance.
- Maintained website uptime and managed code versioning using GIT.
- Collaborated with the Digital Strategy Director and the team to provide technical recommendations and guidance to clients, contributing to overall team efficiency.

MARCH 2022 – JULY 2022

INFORMATION TECHNOLOGY INTERNSHIP (PART TIME), UNIVERSITY OF SHKODER

- Analyzing technical problems and identifying computer requirements to solve those problems with appropriate IT solutions.
- Designing, implementing and evaluating computer-based systems, processes, components, and programs.

- Identifying, analyzing, and responding to user needs for the selection, creation, evaluation, and administration of computer-based systems.

ACTIVITIES

CEECIIS CONFERENCE- ZAGREB/CROATIA

-Presented my project idea in this conference about creating a digital online library where students can download for free school lessons without spending money's or moving in long distances to have their lessons.

Member of YOUTH EUROPEAN COUNCIL

I have been a board member of European Youth Forum council in my city for more than 1 year. I have participated in projects to prevent youth discrimination and poorness. And I'm very proud for the work that's have been done by the organisation.
